Preco Introduces New Economical Line of High-Speed Marking and Cutting Laser Equipment

(Somerset, WI) Preco, Inc., a leading provider of laser processing equipment, is introducing an economical line of high-speed laser systems to complement its current laser system product line. The Preco Golden Laser line offers affordable, entry-level laser equipment alternatives for cutting and marking of signage, filtration products, promotional items, greeting cards, advertising specialties, gaskets, apparel, photos, toys, sports equipment, and other products using composites, card stock, wood, plastic, and industrial fabrics. Processes that traditionally have required one to two minutes can now be accomplished in a matter of seconds.

Preco Golden Laser (PGL) offers several configurations of two different models, the LyraLight and the Inspire. Both are available to accommodate a wide range of material thicknesses, applications and budgets. The LyraLight and Inspire series have been designed to address most material handling requirements by offering shuttle table, conveyor, vision, rotary, multiple beam and auto focus designs.

The Lyralight series offers a galvanometer for high-speed marking, scoring and cutting of thin materials. Adding flying optics creates a combination system that allows more capabilities for marking and cutting thicker materials, all in one machine. Ideal products for processing include basketballs, footballs, designer apparel, adhesive decals, foam gaskets, decorative inlays, memorabilia, serialization identification labels, photos, bats, golf grips, and much more.

Featuring an H-frame gantry motion system, the Inspire series is available in a small or large footprint and can process up to 1000 inches of material per minute. The Inspire series works especially well in processing acrylic signs, personalized cabinet door panels, wood inlays, large sheet graphics, architectural fabric designs, carpet, parachutes, sailboat sails and many other products. Adding a galvanometer to the system offers higher speeds for marking and cutting very large or multiple parts extremely fast, all in a single set up.

We would like to invite you to our showroom for a hands-on demonstration. For more information, visit www.precogoldenlaser.com or contact Preco, Inc., 500 Laser Drive, Somerset, WI 54025 USA Phone 715-247-3285, Fax 715-247-5650.
